

Fire Extinguishers

WET CHEMICAL EXTINGUISHERS

Wet Chemical fire extinguishers are especially designed for fat and oil fires (Class F). The extinguishers use saponification agents to quickly kill the fire and stop re-ignition. They are able to do this by forming a thick layer on the fat or oil, turning it into a soap like substance. Wet chemical extinguishers are also suitable for Class A fires (wood and paper).

Approved to AS/NZS 1841.3.
